## MCGREGOR

McGregor is a village in the Boland region of the Western Cape ±180km east of Cape Town. It is a place of great peace with child-friendly streets; streams; vines; roses; mountains and skies to lift the spirit.

The opportunity of learning in a rural environment brings children in touch with values not easily found in the city.

## A UNIQUE HOLISTIC EDUCATION

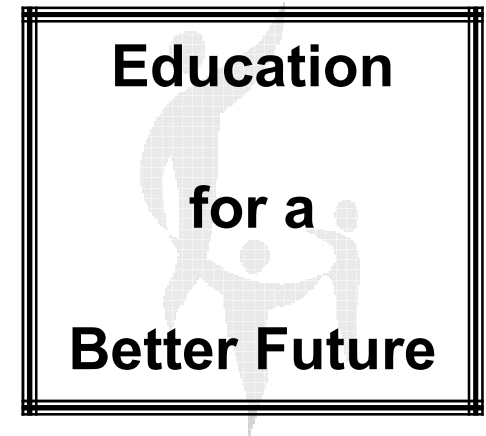

Located in a peaceful rural village, we bring together children of different cultural, social and economic backgrounds.

Founded in 1994, our focus is on providing each child with the opportunity to grow in self-esteem and to develop the skills that will assist them in forging a place for themselves in the world and creating a sustainable future for our country and its inhabitants.

**THROUGH THE POWER  
OF EDUCATION**

## PRIMARY SCHOOL

Our educational program provides a holistic and creative approach, aimed at developing the whole child.

Our curriculum and methods stimulate independent, critical thinking and encourage working constructively with others. Mathematics, languages, natural sciences and the cultural subjects are fully integrated. Lessons incorporate storytelling, drama, movement, painting, music, handwork and crafts.

## HIGH SCHOOL

The programme allows our students to write matric while at the same time receiving practical training which equips them to find meaningful work after school or to manage their own business enterprises.

The inclusion of artistic courses and ecological awareness ensures a fully-rounded education which fosters an innovative and constructive approach to the world.

## HOSTEL

The hostel accommodates students from Grade 7-12 during term times.

The hostel students are encouraged to engage in constructive activities over weekends i.e. choir singing, drama and volunteer work in the community.
